

Client Managed Foot Care Role of Community Care Workers (CCW)

- Support client to maintain basic foot hygiene/healthy feet. *Within an Active Support Framework – Do With, Not For.*
- Prompt client to identify techniques for caring for their feet.
- Assist set-up as required to enable client to undertake foot care.
- If client is having difficulty performing foot hygiene tasks CCW to prompt client to try different ways of doing it. May need adapted equipment.
- To inform assessment worker if client is no longer able to complete basic foot hygiene and maintain healthy feet independently.
- Work with client to complete the screening tool to identify any foot problems .
- Identify and report any changes in foot condition that may indicate a foot problem that needs to be assessed by a podiatrist.

Following requires **urgent action** and GP referral
